June Newsletter

June was filled with sunshine, community events, and simple pleasures that brought smiles throughout the month. As the weather warmed up, there were plenty of opportunities to get outdoors, spend time with friends, and enjoy favorite hobbies. From baking and celebrations to local events and relaxing summer afternoons, June was a wonderful month full of memorable moments.

One of the month's highlights was baking a delicious rhubarb cake to share at a potluck barbecue hosted at the Central Office. It was a fun opportunity to contribute a homemade treat while enjoying good food and great company with friends. LaVonne, Bernie, and Donna were thrilled to all be able to call bingo! There was also plenty of excitement during a treasure hunt hosted by the Central Office, where clever clue-solving skills led to finding the hidden treasure and winning the challenge.

Taking golf cart rides became a favorite way to enjoy the beautiful summer weather and take in the scenery around the neighborhood. Another fun outing included attending the Fun Fest Parade in Durand, Wisconsin, where everyone enjoyed the festive atmosphere, colorful floats, and community spirit.

A favorite pastime this month was spending time outdoors watching the birds. Filling the bird feeders and relaxing outside to observe the many feathered visitors brought hours of enjoyment. It was especially exciting when the birds came close, creating peaceful moments that made June even more special. As the month came to an end, preparations began for Independence Day by decorating for the Fourth of July and celebrating America's 250th anniversary. The patriotic decorations added a festive touch and built excitement for the upcoming holiday.

June was a month filled with laughter, friendship, and appreciation for the little things that make each day special. Whether enjoying community events, spending time outdoors, or preparing for holiday celebrations, everyone made wonderful memories together. We look forward to all the adventures, sunshine, and fun that the summer months will continue to bring.

This newsletter segment will hopefully help you learn more about Great River Homes, Inc. Here we will discuss agency processes, things that affect us, and ways you can help.

Research and discoveries by Albert Einstein created a foundation for the eventual development of laser technology. Today, laser technology serves a vital role in the medical, industrial, and communication fields. Regarding creativity, Albert Einstein once said, *“The important thing is not to stop questioning. Curiosity has its own reason for existing.”* Einstein’s discoveries remind us that genius is not about having all the answers but about daring to ask questions that others never thought to ask.

From the first day of orientation, team members helping support Willie, Bernie, LaVonne, and Donna are encouraged to cultivate curiosity and creativity by asking “outside of the box” questions. Is there a new activity that Willie would enjoy? Is there a new friendship that would help Bernie live their best life? Is there some undiscovered aspect of technology that would help improve LaVonne’s quality of life? Is there a way something in the house could be modified to make the home safer for Donna?

The questions are endless. Is there a _____? Please feel free to share your questions and creative ideas about how we can help better support Willie, Bernie, LaVonne, and Donna.

“The important thing is not to stop questioning”
