June Newsletter

June was a month filled with opportunities to relax, reconnect with family and friends, and enjoy the beautiful start of summer. Whether traveling to exciting destinations, spending time with loved ones, or participating in favorite community activities, everyone found meaningful ways to make lasting memories. From local outings to unforgettable vacations, the month was full of smiles and special experiences.

KayRine had a wonderful month staying active and connected with others. A highlight was enjoying dinner with old roommates from 613, giving everyone the chance to catch up and reminisce about shared memories. She also enjoyed a visit to the Como Zoo, where she spent time seeing the animals and enjoying the beautiful gardens. Music Under the Bridge provided an evening of great entertainment, while attending church and participating in Fresh Start continued to be meaningful parts of her routine.

Lindsay enjoyed a quieter and more relaxing month. She treasured the opportunity to return home to visit her mom and family, spending quality time with the people she loves most. Sometimes the best memories come from simply slowing down and enjoying time together, and she appreciated every moment of her visit.

Kris had an unforgettable June with an exciting vacation to Florida. She was blessed with beautiful weather throughout her trip and enjoyed spending quality time with family. One of the biggest highlights was visiting Disney World with her sister. She had an amazing time experiencing the rides, soaking in the magic of the parks, and creating memories that she will cherish for years to come.

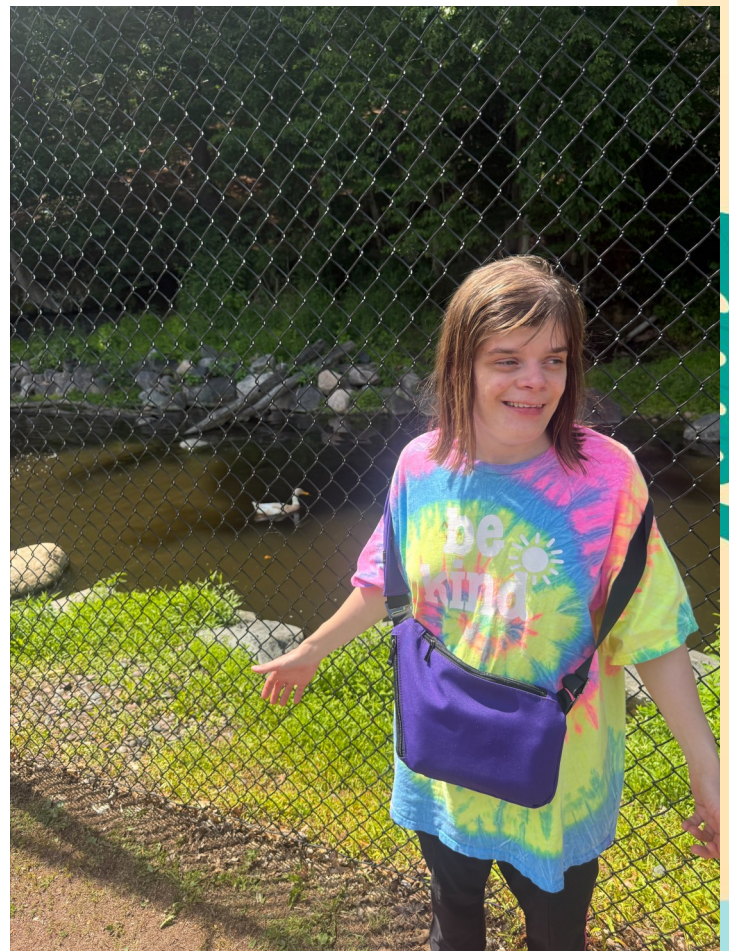

Jenny stayed active and engaged throughout the month. She continued participating in water aerobics, enjoying both the exercise and the opportunity to socialize. She also attended Badger Camp, where she had fun participating in activities and spending time with others. A trip to the Como Zoo rounded out the month, providing another enjoyable summer adventure.

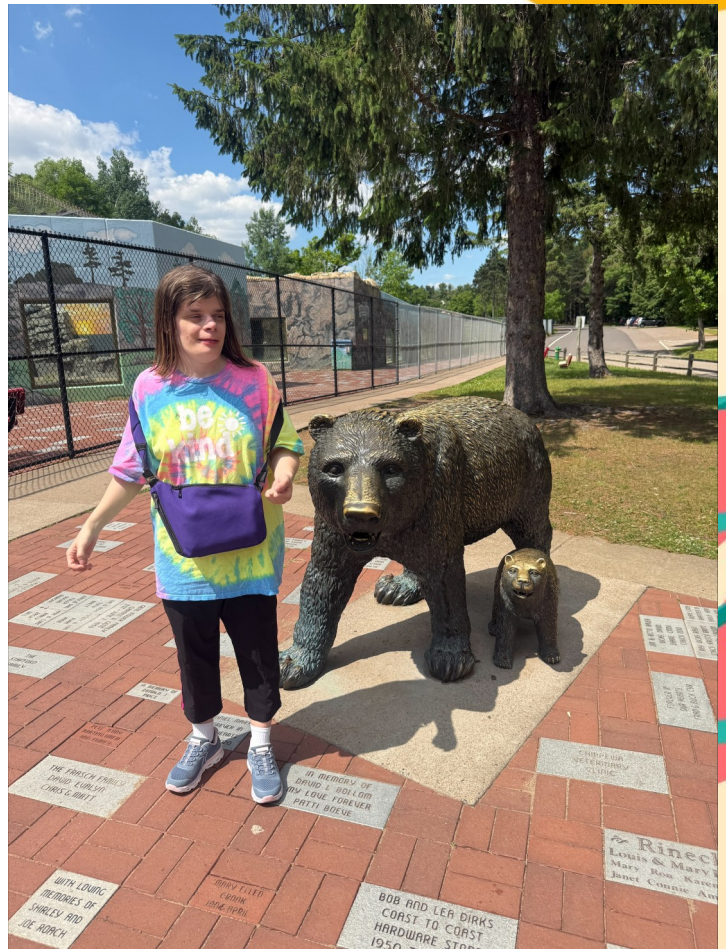

As June came to a close, everyone looked back on a month filled with friendship, family, adventure, and relaxation. Whether exploring new places, reconnecting with loved ones, or enjoying favorite community activities, each experience helped make the month special. We look forward to all the fun, sunshine, and new memories that July is sure to bring!

This newsletter segment will hopefully help you learn more about Great River Homes, Inc. Here we will discuss agency processes, things that affect us, and ways you can help.

Research and discoveries by Albert Einstein created a foundation for the eventual development of laser technology. Today, laser technology serves a vital role in the medical, industrial, and communication fields. Regarding creativity, Albert Einstein once said, *“The important thing is not to stop questioning. Curiosity has its own reason for existing.”* Einstein’s discoveries remind us that genius is not about having all the answers but about daring to ask questions that others never thought to ask.

From the first day of orientation, team members helping support Kris, Jenny, KayRine, and Lindsay are encouraged to cultivate curiosity and creativity by asking “outside of the box” questions. Is there a new activity that Kris would enjoy? Is there a new friendship that would help Jenny live their best life? Is there some undiscovered aspect of technology that would help improve KayRine’s quality of life? Is there a way something in the house could be modified to make the home safer for Lindsay?

The questions are endless. Is there a _____? Please feel free to share your questions and creative ideas about how we can help better support Kris, Jenny, KayRine, and Lindsay.

“The important thing is not to stop questioning”
